

## CALL FOR PAPERS

### ***Baltic Worlds'* Special Section on Economic conditions for inhabitants in the Baltic Sea Region: Challenges and opportunities for livelihoods and businesses in coastal areas, archipelagos and islands in the Baltic Sea Region**

*Baltic Worlds is a scholarly, multidisciplinary publication, with international distribution that covers the vast area of the Baltic Sea Region, East Europe as well as Russia and the post-socialist states in Caucasus and Balkan. The journal Baltic Worlds is published by the Centre for Baltic and East European Studies (CBEES) at Södertörn University, and is financed by funds made available by the Östersjöstiftelsen (Foundation for Baltic and East European Studies). The journal practice double-blind peer review by at least two independent specialists. A peer-reviewed article published in Baltic Worlds generates one publication point for the authors and their institutions in the Norwegian bibliometric register (DHB). It is an Open Access Journal and all content is freely available without charge to the user or his/her institution.*

*Baltic Worlds* will publish in 2019 a Special Section on Economic conditions for inhabitants in the Baltic Sea Region, edited by ass. Prof. Paulina Rytönen (Södertörn University) and PhD Nadir Kinossian (University of Leipzig).

#### CfP

Over the last decades, concerns about the special challenges faced by inhabitants and business owners in the Baltic Sea Region has accelerated as reports about depopulation, ageing population, increasing socio-economic gap between coastal rural areas and urban areas, and not the least, pollution of the marine environment in the Baltic Sea continue to raise the interest of the public and authorities at regional, national and European level.

In previous studies, contextual, spatial, geographic, institutional, political, technological, environmental and social pre-conditions for social cohesion, economic development and solutions to environmental challenges in rural and less favored areas, have thoroughly been highlighted. However, our understanding about the special conditions of coastal areas, archipelagos and islands, especially in the Baltic Sea Region is still scarce. We therefore openly invite scholars addressing social-technological, spatial, geographic, economic and environmental challenges and opportunities for living, working and conducting businesses in coastal areas, archipelagos and islands in the Baltic Sea Region (BSR). We like to encourage papers with empirical evidence and theoretical insights through original research and review articles addressing the following issues:

- Contextual/institutional challenges, opportunities and arrangements that are specific for living, working and conducting businesses in the BSR
- Risk, uncertainty and ambiguity concerning living, working and conducting businesses in the BSR
- Strategies (from below) to meet challenges and opportunities concerning living, working and conducting businesses in the BSR
- Case studies, comparative studies and theoretical contributions about living, working and conducting businesses in the BSR
- Spatial dimensions of living, working and conducting businesses in the BSR
- Institutional controversies and the role of policy in the BSR
- Population issues and debates in the BSR
- Challenges and opportunities surrounding the use of local natural resources in the BSR

- The construction of local identities
- Stakeholder analysis connected to living, working and conducting businesses in the BSR
- The interplay between living, working and conducting businesses in the BSR and environmental challenges
- Cases of, or grounded concepts for socio-technical systems that serve societal or environmental improvements in the BSR
- Historical aspects connected to living, working and conducting businesses in the BSR
- Epistemological, methodological and ethical aspects of studying livelihoods and businesses in the BSR

The volume will comprise five selected peer-reviewed articles not exceeding 8,000 words each, including abstract and keywords. Please familiarize yourself with *Baltic Worlds*, you find all issues open access at the [Baltic Worlds' website](#).

A prerequisite for publishing scientific articles in the *Baltic Worlds* is that the article not already be published in English elsewhere. If an article is simultaneously being considered by another publication, this should be indicated. *Baltic Worlds* practice double blind peer-review by two anonymous, independent reviewers, at least at post-doc level, [following the reviewers' guidelines](#).

Before you send in your article, kindly read our [Style Guide and follow the instructions](#).

#### Deadlines

Submission of abstracts:	8 <sup>th</sup> of June 2018
Note of acceptance of abstract:	21 <sup>st</sup> of June
Submission of full manuscripts:	1 <sup>st</sup> of October
Final revised manuscripts:	1 <sup>st</sup> of February
Special issue release:	April 2019.

Please, you are welcome to submit abstracts by June 8, 2018 as an attachment to [paulina.rytkonen@sh.se](mailto:paulina.rytkonen@sh.se) and [N\\_Kinossian@ifl-leipzig.de](mailto:N_Kinossian@ifl-leipzig.de)

For more information about *Baltic Worlds*, please contact the editor Ninna Mörner, [ninna.morner@sh.se](mailto:ninna.morner@sh.se)
